

# I Feel It

Amanda Somerville

I can't hardly wait to you get home  
The thunder calls me and, man, I roll  
When that fire spreads and I need you badly (so badly baby)  
Just give me your love and I'll take care of you baby

When you're here I don't quite know where here is  
You get me lost, get me there, get me so near this  
Legs and tongues and fingers and my heat's up  
Running through, running on, running over  
And then some

Do you love me?  
Because I feel it  
Do you love me?  
Oh, I know that you love me  
Because I can feel it  
And we've got to keep burning on like this  
Show me how deep love is  
Just love me

Sink your teeth right in, go on and burn me  
You know I like it, don't worry, you ain't gonna hurt me  
The tide comes on and I just want to ride the wave  
And wrap around your warmth  
Just let me bathe in it

Do you love me?  
Because I feel it  
Do you love me?  
Oh, I know that you love me  
Because I can feel it  
And we've got to keep burning on like this  
Show me how deep love is  
Just love me

Down, down, down  
Take me down  
Scorch me, torch me  
Just love me  
I'm all wet with your fire  
You can take me down, take me higher

Do you love me?  
Because I feel it  
Do you love me?  
Oh, I know that you love me  
Because I can feel it  
And we've got to keep burning on like this  
Show me how deep love is  
Just love me
