

You Can Always Reach Me

Amanda Stott

When my hopes are fading
When I'm in way too deep
If my faith is shaken
You can always reach me
In the heart of a dark night
When all reason leaves me
When the walls get too high
You can always reach me

So if you're sinking, if you're ever stuck
And you can use a helping hand to lift you up
Any time you need me
You can always reach me, my love
You can always reach me

If you're on a lost road a sea that's stormy
Anywhere that you go
You can always reach me
It doesn't take a telegram or a train, believe me
When your heart is where I am
You can always reach me

So if your dreams are scattered in the wind
Or if you feel the lonely shadows closing in
Any time you need me
You can always reach me, my love

Oh, there is nothing stronger than my love
No matter what the world around us does
We're always in touch

When my hopes are fading
When I'm in way too deep
If my faith is shaken
You can always reach me
In the heart of a dark night
When all reason leaves me
When the walls get too high You can always reach me

So if you're sinking, if you're ever stuck
And you can use a helping hand to lift you up
Any time you need me
You can always reach me, my love
You can always reach me, my love
My love, for there is nothing stronger than my love
