

We're going faster like a bullet 'round
To save the future for the humankind
Faster

Depleted every source, endangered our own lives
A soil that is burned, destruction unrepairable
War of the worlds; orchestral demise
So what comes up always falls straight back down

Losing the hope to save what's left for you and me
Dancing on strings above the abyss I cry
Reach for the skies

We're going faster like a bullet 'round
To save the future for the humankind
We set ourselves on fire for our last goodbye
We're going faster like a bullet 'round
To save the future for the humankind
We're giving our hearts away, we're going faster

Defeated every threat and made this habitat burn
This cynical form, mankind made sure we never turn
Mission is set; we colonize afar
An epiphany for us all as there is no withdraw

Losing the hope to save what's left for you and me
Dancing on strings above the abyss I cry
Reach for the skies

We're going faster like a bullet 'round
To save the future for the humankind
We set ourselves on fire for our last goodbye
We're going faster like a bullet 'round
To save the future for the humankind
We're giving our hearts away, we're going faster

Losing the hope to save what's left for you and me
Dancing on strings above the abyss I cry
Reach for the skies

We're going faster like a bullet 'round
To save the future for the humankind
We set ourselves on fire for our last goodbye
We're going faster like a bullet 'round
To save the future for the humankind
We're giving our hearts away, we're going faster
