

# Fireball

Amaranthe

How can I justify before it fades  
When all I want is more, more, more, yeah?  
Like a wrecking ball each step I take  
'Cause every time you're screaming my name

I can't take it any longer  
Cross your fingers, say a prayer  
There's no way out, I'm leaving you there  
Face this mess, your days are numbered  
Will I live to survive?

I will light the sky  
I will make you whole like a fireball  
I will make it rain  
Like a waterfall I am your fireball

Holding my breath, I'm about to explode  
Counting down again like three, two, one, boom  
Would you be satisfied to stand out in the rain  
With no sympathy, like dogs fetch a hand grenade

I can't take it any longer  
One step back, review the past  
A lesson learned where bridges still burn  
Face this mess now you're outnumbered  
But I'm making you rise

I will light the sky  
I will make you whole like a fireball  
I will make it rain  
Like a waterfall I am your fireball

Breakdown, ten to one, my hunting ground  
Our chemistry blend all in all  
This fight is mine, I never bow  
Countdown, ten to one, my playground  
You will never ever get me but  
I'll break you down (Fireball)

I will light the sky  
I will make you whole like a fireball  
I will make it rain  
Like a waterfall I am your fireball

I will light the sky  
I will make you whole like a fireball  
I will make it rain  
Like a waterfall I am your fireball
