

# Make It Better

Amaranthe

Eight billion souls to change the reason why  
I've always walked with blindfolded eyes  
'Cause they always told me it's impossible  
To make it better

Standing in line to the end of your life  
"Let go your dreams, forget what's right!"  
Society told you it's impossible  
To make it better

What we change will be forever!

Maybe we should know better (Better)  
Deep inside  
Let us rule the world together (Together)  
You and I (You and I)  
And if you dare to take a stand  
It's you and me until the end  
So make it better  
What you do will be forever (So make it better)

What will it take to open up your eyes  
To lead the mute, the deaf, the blind?  
'Cause I have predicted the impossible  
We stand together (Yeah)

It's time you see the reason to the rhyme  
Who cannot walk, he cannot climb  
Society's change is unstoppable  
So make it better

Now's the time to stand together!

Maybe we should know better (Better)  
Deep inside  
Let us rule the world together (Together)  
You and I (You and I)  
And if you dare to take a stand  
It's you and me until the end  
So make it better (Better)  
What you do will be forever (So make it better)

We can rule the world together  
So make it better  
What you see will be forever  
So make it better

Maybe we should know better  
Deep inside  
Let us rule the world together (Together)  
You and I (You and I)  
And if you dare to take a stand  
It's you and me until the end  
So make it better (Better)  
What you do will be forever (So make it better)

We can rule the world together

So make it better  
What you see will be forever  
So make it better
