

Getting high at 6am  
I just cried so much again  
I need you (I need you)  
My last lover poisoned me  
With bitterness will you be sweet?  
I need you (I need you)

I hate (I hate I hate I hate)  
That I need you (I don't wanna need you)  
Cause one day (one day one day one day)  
I'll have to leave you

I wish I would have known  
The damage I was doing to my soul  
Being with somebody who just made me feel alone  
I should have known  
He was just another fucking clone  
Denying my reality just like they did at home

It scares me to want you now  
New love brings me fear  
I keep my distance but I love how you feel (feel feel feel)

Getting high at 6am  
Numbing my pain with my pen  
I need you (I need you)  
Reflecting on all the things  
I have noticed recently  
I need you (I need you)

I hate (I hate I hate I hate)  
That I need you (I don't wanna need you)  
Cause one day (one day one day one day)  
I'll have to leave you

I wish I would have known  
The damage I was doing to my soul  
Being with somebody who just made me feel alone  
I should have known  
He was just another fucking clone  
Denying my reality just like they did at home

It scares me to want you now  
New love brings me fear  
I keep my distance but I love how you feel (feel feel feel)

Quiero tu amor  
Quiero tu amor  
Quiero tu amor  
Quiero tu amor

(One day I'll give my heart away  
But only as a gift  
To the universe)
