

I wish we met when we were younger  
Had all the time in the world  
And I'd know everything about you  
Before any other girl  
We'd be together  
With only stories of us  
There would be no other  
Who'd ever felt your touch  
I'd be your first kiss, first love, first one

I missed so many firsts in your life  
And you missed so many of mine  
All that has passed, will in time turn to dust  
I will always be your ever last

I wish you'd met my father  
Just to shake his hand  
He'd have given you a hard time  
Just because he can  
But he would have loved you  
Like another son, but that's just how it goes  
Time rolls on and on  
Wish I was your first kiss, first love, first one

And it feels like I always knew you  
Like home when I fell into you  
And I know time goes fast  
I promise love that lasts

So I'm looking forward for the best is yet to come  
Forget about all others forget about old loves  
For you are my future, forever hold me close  
We'll raise a little family, together we'll grow old
