

# Different Places

Amber Mark

Sometimes  
I feel like I have zero clue  
What's going on in your head  
What's going on with your moves

Don't know why  
We're having separate nights out  
Are you happier, babe  
I don't wanna find out  
'Cause I hate it when

We dance in different places  
When we dance in different places  
We dance in different places  
When we dance in different places

We dance in different places  
When we dance in different places  
We dance in different places  
When we dance in different places

Most nights  
Feel us getting so close  
Keeping me on my toes  
As we turn into an almost  
You and I  
Have we fallen out of love yet?  
Doing all these circles  
'Round around the subject  
I hate it when

We dance in different places  
When we dance in different places  
We dance in different places  
When we dance in different places  
Dance in different places  
When we dance in different places  
We dance in different places  
When we dance in different places

We dance in different places  
Places  
We dance in different places  
I hate it when

We dance in different places  
When we dance in different places  
We dance in different places  
When we dance in different places  
Dance in different places  
When we dance in different places  
We dance in different places  
When we dance in different places
