

# Machine

Amber Run

I knew that it was coming  
I could tell by the look on your eyes  
Oh, how could I forget you?  
How could I forget that smile?

We've been living life by numbers  
Living a second at a time  
But it's everything, everything

If we come together, are we part of a machine?  
If we're starting over, are we living in a dream?  
But do you love me?  
Do you love me?

And it's coming out backwards  
It's coming out like I don't care  
And I want to tell you everything  
I want to give my soul for you

But it's everything, everything

If we come together, are we part of a machine?  
If we're starting over, are we living in a dream?  
But do you love me?  
Do you love me?

Because you'll never know  
You'll never know  
Oh, what you really mean  
But if you hold me tight  
Lily white  
But you cut like a disease  
And if you're ever safe  
You're God bless  
What does that make me?

If we come together, are we part of a machine?  
If we're starting over, are we living in a dream?  
But do you love me?  
Do you love me?

Yeah, do you love me?  
Yeah, do you love me?
