

## Rocket Flare

Amen Dunes

When I had used up the rocket flare  
I expanded on the hand flare  
When the circle could see me there  
I take it with my wish here  
I feel like I have no more time there  
Freak of chemistry smelled like cumin  
What chance was there that you'd be there  
I take it with my wish here  
If I could laugh at your sorry pair  
Take it with my time there  
I feel like I have no more time now  
Last impressions take your chances

You might think it's dancing  
Though you know I know better  
And when you're relaxing  
You know I get better  
And if you're expanding, expanding minds  
You know that I can't, I can't  
When I was killing, drilling mine  
I was insulted so that I was the sultan

When I had used up the rocket flare  
I expanded on my hand flare  
When the circle could see me there  
I take it with my will there  
I feel like I have no more time now  
Last impressions take your chances

You might think it's dancing  
Though you know I know better  
And when you're relaxing  
You know I get better  
And if you're expanding, expanding minds  
You know that I can't, I can't  
When I was killing, drilling mine  
I was insulted so that I was the sultan, yeah
