

What Happened

Amina Buddafly

Girl don't try him, we don't like him, that boy trifling
A fuck boy like him can't get it
Those are the type of conversations we've been having
My bitches know I be up to no good
Bout to be giving it up when I should not
I know the type magic wood, lies so good
At least I thought cause he kept it a 100 and I understood

Trust in me I'll be your lesson
Call me tonight I'm your blessing
I'll waste your time, keep you guessing
Lying in your face while we sexin'
I love how you do me
So good like we should mega a movie
Just know tomorrow you'll be stressing
Trying to figure out what happened

He gave it to me straight up
Said he'll be gone before I wake up and the truth hurts but I need it
So I don't fall in love, my bitches know I'll be waiting all night
I be the fool hoping he gonna wife me, someone got me dickmatized
I can't hide, you're so bold and it's turning me on, say it just one more ti
me

Trust in me I'll be your lesson
Call me tonight I'm your blessing
I'll waste your time, keep you guessing
Lying in your face while we sexin'
I love how you do me
So good like we should mega a movie
Just know tomorrow you'll be stressing
Trying to figure out what happened

That cloth that we came, they don't make it no more
Somebody else probably wouldn't take it no more
These feelings ain't a game I can't play it no more
Before I call you out your name I won't say it no more
Home is where the heart is you don't stay there no more?
You listening to them hoes I ain't a player no more
What happened to attention we don't pay it no more?
Let's get back to the love we don't display it no more
I feel like we should talk and vacation some more
I feel like we should go out our location some more
I feel like that'll help our situation some more
Make the little moments and occasion some more
Don't wanna see the tears in our faces no more
I wanna see the years and our greatness some more
I think we need to put a little faith in some more
And prove whoever wrong that said we wouldn't make it no more

Trust in me I'll be your lesson
Call me tonight I'm your blessing
I'll waste your time, keep you guessing
Lying in your face while we sexin'
I love how you do me
So good like we should mega a movie
Just know tomorrow you'll be stressing

Trying to figure out what happened
