

# Versus the World

Amon Amarth

One we were scum of the Earth  
Now we've cleared our names  
In Nifelheim came rebirth  
Baptized in Mount Doom's flames

A decade now we've fought this war  
Never yielding from our path  
Our journeys take us to foreign shores  
Where we let our metal blast

We've been battered and left for dead  
We've been beaten and we have bled  
But we always made it through - versus the world  
This may be our last quest  
Before we're put to rest  
The end is coming soon - versus the world

Warriors of the grave took us south  
Hell bent on genocide  
They made us face the brutal truth  
This would be no easy ride

Grotesque creatues of the sky  
Met with us on winter fields  
Christian god cast aside - Massacre of hallowed eve

We've been battered and left for dead  
We've been beaten and we have bled  
But we always made it through - versus the world  
This may be our last quest  
Before we're put to rest  
The end is coming soon - versus the world

Persian demons brought us south  
On merciless campaign  
We've raided the western shores  
Always going against the grain

All these years we've fought to win  
And sometimes almost died  
I tell you now we won't give in  
Without a vicious fight

We've been battered and left for dead  
We've been beaten and we have bled  
Versus the world
