

Chase Away

Amplifier

Well it's just like anyday to chase away
Because the outside world is something hard to chase away

Because sixteen is round about the time
That your heart first is breaking
You can't hear there's just so many voices
Preaching love, preaching hatred

They all fade to grey

So don't let them chase you away

Well I came and hung out on your line to chase away
Like I'm just some scarecrow in a field to chase away

Because good guys always fall apart
I have learned from observation
They're just a long haired freak circus procession

So let's fill it up with good intention

And it's just a matter of time
Before the day and our baby is waking
Up war machines and space invaders
The lovers and the haters
I wish I could make them
All fade to grey

But don't let them chase you away
Chase away

Don't let them chase you away
Don't let them chase you away
Don't let them chase you away
Don't let them chase you away
Don't let them chase you away
Don't let them chase you away
