

Freakzone

Amplifier

Hey mistress freak
Be living in a dream
Don't you [???] that is coming
Lead us down to this promised land

Now that the future is here
We really don't need to wait
We're coming down at seven four two seven
[???] hey!

[???]

Got [???] thrill
And an evil eye
A psychedelic pill
For holding up the sky

Don't you know that any time
You wanna come around
When the devil needs a friend [???]
And wait for you to come around, hey!

Do you believe
That every freak is born [???]
To the joker in the sky that's tumbling down on me
Reach right up to the rooftops
Every [???] that is exploding
Don't everybody know that it's going to be

Just like everybody's first time
There's no need be afraid

Cause when you let it through it will be light year away
Too far away
Too far away
Too far away

[???] freak, freakzone
Freak, freakzone
Freak, freakzone
Freak, freakzone

When I believe
That every freak is born [???]
To the joker in the sky that's tumbling down on me
Reach right up to the rooftops
Every [???] that is [???]
Don't everybody know that it's going to be
Just like everybody's first time
Just like the first time

Cause when you let it through it will be light year away
Too far away
Too far away
Too far away
