Scarecrows

Amplifier

I wish we could be vampires, let the sun set us on fire
I've got your picture on the flyer, that's on my wall
I like to think I'm solid stone, I need to spend my time alone
So why I feel you in my bones, with your hands on my soul

How's about that me and you, forgot this life to start anew?
Like two scarecrows that upped and flew, flew... far away

Never got to see much sun, been stuck in darkness far too long
And where have all our twenties gone? Well, its difficult to se
e

We never seem to play that song, we never seemed to care
Only ever seem to care, that's all it seemed. That's all it see
med

And more than just amphetamine, and wanting to be Steve McQueen

In the one that had the car chase scene, through San Francisco

My need for you could become such, that I could love you far to
o much
And lose the pain I need to touch. Yes, it's all I know
It's all I know my dear, but it's all I know
You're my echo my dear, it's all I know

And f*ck the money we ain't made, and let the words drop off th
e page
And let the music be my cage, and let it be yours
I really had to be at mind, and feel the need to speak my mind
You think that we're two of a kind. What could ever be?
Could we ever be, my dear? Could we ever be?
Will we ever be, my dear? Will we ever be?
Could we ever be, my dear, well, what could we be?
