

# Welcome To The City

Amy Diamond

Well done - Welcome to the city  
You'll become number one with a witty tongue - we praise the young  
Have a ball - Have it all, do whatever  
Hit the wall - Get the call and you better pay  
There's no other way

Throw your pennies in a wishing well  
Might get heaven and you might get hell  
Thunder, lightning ain't that kinda frightening  
Saints and sinners on the road to fame  
(You) ain't no winner 'til we know your name  
Black white flashlight - show me what you got

Have a good bite out of the city  
Take a long cold look at the world  
You might crash - burn  
Either way you'll learn  
Good bite out of the city

Free your mind - your behind's gonna follow  
Do the crime - Do the time when tomorrow comes  
We're the pretty ones  
Shop around, settle down, get a job, be a slob  
What you get, what you give's your prerogative  
That's how we live

Throw your pennies in a wishing well  
Might get heaven and you might get hell  
Black white flashlight - show me what you got

Have a good bite out of the city  
Take a long cold look at the world  
You might crash - burn  
Either way you'll learn  
Good bite out of the city

Show and prove - do or die  
We don't sleep - we don't cry  
Hit 'em low - hit 'em high  
Take an eye for an eye

Have a good bite out of the city  
Take a long cold look at the world  
You might crash - burn  
Either way you'll learn  
Good bite out of the city

Repeat
