

Babe

Amy Shark

Life was pretty easy before that night
Two best friends who like to play fight
Went to give you a kiss on the cheek good night
No big deal, I do it all the time

You turned your head quite suddenly
And your lips were right in front of me
And I kissed you accidentally
I won't lie it was heavenly

And I could've stopped but I didn't so here we are
And I knew we had something but I never thought it'd get this far
But here we are

Is there anything you want to talk about?
You said like what
I said don't play around
You said just leave it alone, babe
What if I can't, babe?
Is there anything you want to say to me?
Like, baby, if we don't stop we'll ruin everything
You said you better go home, babe
If that's what you want, babe

And now it feels weird when we're all alone
This is so silly I'm just gonna go
But there's always this look in your eye
Like you want to say something but you just might cry

And I know you and all you're doing is protecting your heart
And you know me and how I feel so here we are
So here we are, babe

Is there anything you want to talk about?
You said like what
I said don't play around
You said just leave it alone, babe
What if I can't, babe?
Is there anything you want to say to me?
'Cause baby, if you don't talk I'm gonna fucking leave
You said you better go home, babe
If that's what you want, babe

Is there anything you want to talk about?
You said can we not
Do this now?
You said just leave it alone, babe
What if I can't, babe?
Is there anything you want to say to me?
Like, baby, if we don't stop we'll ruin everything
You said you better go home, babe
If that's what you want, babe
