

The Wolves

Amy Shark

What's left of me for the wolves just pick around the bone
I like your company, why would you leave me here all alone
Oh oh
And I lay under the smoke and the falling debris
And all you animals come take a bite out of me
Oh oh

Don't you know the wolves are out
I think I'm coming back to life
I didn't know what to do
Didn't matter 'cause I had you
When everybody ran away
I thought you'd be the one to stay
Don't you know the wolves are out
And everyone was right about you

What's left of me but my name on a dirty floor
Am I already more than you bargained for?
And I just want to be held in a particular way
I got a chemical running through me every day

Don't you know the wolves are out
I think I'm coming back to life
I didn't know what to do
Didn't matter 'cause I had you
When everybody ran away
I thought you'd be the one to stay
Don't you know the wolves are out
And everyone was right about you
Everyone was right

You know it will haunt you in the night
All the pretty lights
Keep me, hold me tight

Don't you know the wolves are out
I think I'm coming back to life
I didn't know what to do
Didn't matter 'cause I had you
When everybody ran away
I thought you'd be the one to stay
Don't you know the wolves are out
And everyone was right about you
Everyone was right
