

Anything 4 U

Anabel Englund

Anything for you

Lately you ain't seen the sun enough
I think destiny's been callin' for ya
It's your choice now, no more actin' tough
Will you just pick up? Change is all you need

Six years, have you known me to let you down?
You try so hard to blend in with the crowd
Your colors loud and you stand out
Can't you see? I'll do anything for you

Anything for you, anything for you
Anything for you, anything for you
Anything for you, anything for you
Can't you see? I'll do anything for you

I'll hold your secrets 'til I'm ancient
And I'll carve our names on the pavement
And when you're solvin' the equation
We won't cancel out, here I'll be waitin'
I won't let you slide, I can see you hidin'
I can't live your life, but I'll stay by your side
I won't let you slide

Six years, have you known me to let you down?
You try so hard to blend in with the crowd
Your colors loud and you stand out
Can't you see? I'll do anything for you

Anything for you, anything for you
Anything for you, anything for you
Anything for you, anything for you
Can't you see? I'll do anything for you
Anything for you, anything for you
Anything for you, anything for you
Anything for you, anything for you
Can't you see? I'll do anything for you

Walkin' hand in hand with each other
I would never change you for another
Winters always change into summer
Know I'll be there, I'll do anything for you

Anything for you, anything for you
Anything for you, anything for you
Anything for you, anything for you
Can't you see? I'll do anything for you
Anything for you, anything for you (Oh, yeah)
Anything for you, anything for you
Anything for you, anything for you
For you, for you, yeah
