

## Fall Away

Anamanaguchi

Fall, fall, fall away  
In a wild word  
In a wild word  
Fall, fall away  
In a wild word  
In a wild word

Star shootings all, you're allowed to go  
You're allowed to fall, get to, get to go  
It's a lot to go, it's a lot to fall  
Get to, get to go, to go and get it  
Far, far awake  
In a wired world  
In a wired world

And that's what these are good for  
Making the visions beginning to end  
Yeah, and that's what these are made for  
Reopened a planet delivered again

Feel free to become what you hate  
All style when we come to waste  
I feel 'em dream and scream in pain  
In pain

Fall, fall, fall away  
In a wild word  
In a wild word  
Fall, fall away  
In a wild word  
In a wild word

Star fallings all, it's about to blow  
If you want to know, you're about to know  
Got to let it go, got to let it go  
If you get to go, you know you let it  
Far, far awake  
In a wired world  
In a wired world

And that's what people pay for  
A thousand and one, beginning to end  
Yeah, and that's to make you grateful  
Noises and signals exchanging their hands
