

I didn't know that you were perfect  
I didn't know you couldn't lie  
You tried to twist it up reverse it  
Oh, you're the apple of my eye  
At least your try

You've got to move along  
You keep on holding on  
You keep me up all night  
Or at least you try  
You spin my head around  
Why can't you hold this down  
You keep me up all night  
Or at least you try

I think it's time I need to wake you up now  
Both my hands are starting to untie  
'Cause I've seen pictures of us younger  
You still make me laugh until I cry  
Or at least you try

You've got to move along  
You keep on holding on  
You keep me up all night  
Or at least you try  
You spin my head around  
Why can't you hold this down  
You keep me up all night  
Or at least you try

Or at least you try  
Or at least you try

You've got to move along  
You keep on holding on  
You keep me up all night  
Or at least you try  
You spin my head around  
Why can't you hold this down  
You keep me up all night  
Or at least you try
