

Hold On

Anavae

You got that look in your eyes
Already know what you're thinking
And if your life flashed before your face
Would you notice?
Just wanted to know your feelings
To see the light in the dark
And if we must part ways
Then tell me it was worth it

I think we lost ourselves
Somewhere between our love and pain

Don't tell me to hold on
When the night is young, there's time to come undone
Why'd you throw us away?
Why'd you give up the fight?
Cold-hearted lover for life
Don't tell me to hold on
Why'd you throw us away?
I just want you to stay

Who ever said it was easy
Have missing parts of their brains
Or maybe I thought too much about it
Maybe I broke it
Why did your chemicals run so dry?
Thought love was meant to make you high
Where does it go after death?

I tried to make amends again

I think you lost yourself
Somewhere between your heart and brain

Don't tell me to hold on
When the night is young, there's time to come undone
Why'd you throw us away?
Why'd you give up the fight?
Cold-hearted lover for life
Don't tell me to hold on
Why'd you throw us away?
I just want you to stay

I just want you to stay, chase the demons away
I just want you to stay, chase the demons away

Don't tell me to hold on
When the night is young, there's time to come undone
Why'd you throw us away?
Why'd you give up the fight?
Cold-hearted lover for life
Don't tell me to hold on
Why'd you throw us away?
I just want you to stay
I just want you to stay
