

Night

Anavae

I wished in the worst for you
I prayed for the worst to come true
Wade through all the things you do
I am flawed in ways you'll never know

I didn't make it this far
Surely I'm still dreaming
I'm lying on the floor and wide awake
None of it is true

You'll be sleeping next to me
Would you still kill me in the end?

I will try to make it through the night
And I will try to wake before I die
I'll make it through the night
(Hey)

Sleep tight the worst has come
I'll pray that hell will take me home

Cause I'm living on a knife's edge
Can't tell if I should love or hate
I wanted you to fall
And break the way I did too

But now I will try to gather
All the pieces of my mind

I will try to make it through the night
And I will try to wake before I die
I'll make it through the night
(Hey)

Try to make it out alive
Wish it was a lie
Just make it through the night
Make it through the
(Hey)

Try to make it through the night
And I will try to wake before I die
I'll make it through the night
