Millions of planets
Light years far away
Perfect conditions
To support the human waste

Mother Earth not replaceable
Life limits impassable
Breathing air from respirators
A steel prison, an incubator

Jason's flight for freedom
Has now reached known Galaxy's end
Still believing in a new world
A cosmic portal to the Promised Land

Black passage to a cosmic void
An unending journey to astral plains
Intensified emotions of a synthetic life
Rapid fall to the Great Divide

[Solo:]

Dark shadows of past
Turn all into dust
Now the plan is unveiled
The creation of a new legion of "men"
