

Electrocution

And One

(Convicted killer Daryl Holton died just after 1:00 o'clock in the morning.
We wondered if the chair would even work. It did!
Daryl Holton died jolted by 17 hundred and 50 volts of electricity.
Witnesses watched the states first electrocution since 1960 from behind glasses.
Others had closer contact)

Others had closer contact
Others had closer contact
Others had closer contact

Reflecting the pain of the people who lost all their heads
Rape and the music collapsing religion instead
The evil came around in disguise to drum the engineer
We want the electrocution
We want the electrocution

The guide is a light and you see the tunnel of human rights
Use your power and forget the malison inside
We came in peace and now we answer
He dies - now we're free
We want the electrocution
We want the electrocution

Tonight is the night
The end of the fight
You drop the gate
(We have the easy solution)
You drown into white
We switch on the light
Your death is near
(You get millions of volts)

We are the voice of the people
We push the button without any warning
Die baby die
Straight up to the sky
Electrocution

No candlelight, no quitting!

We are the voice of the people
We push the button without any warning
Die baby die
Straight up to the sky
Electrocution

No candlelight, no quitting!
No candlelight, no quitting!
No candlelight, no quitting!
No candlelight, no quitting!

Tonight is the night
The end of the fight
You drop the gate
(We have the easy solution)
You drown into white

We switch on the light
Your death is near
(You get millions of volts)

We are the voice of the people
We push the button without any warning
Die baby die,
Straight up to the sky
Electrocution
