

About It

Andra Day

Hard to go to sleep when it feels better than your dreams
It's just me and you
Not even gon' hold, I wanna hold you forever
Is this just something we doing, 'cause I
Found the safest space in you to confide in
Underneath your wave, you must be Poseidon
Caught up in a current that we both lost in
Treasure in my chest, how we so locked in

You are my guy
You're my type too
One thing 'bout lies, that is not you
Like what I like and I like you
You already know you're all about it, 'cause

You want me to love you
Want me all over you, baby
You don't gotta hide it
You want me to have your baby
Yeah, you all about it and I'm all about it, babe
I know you valid, I would never doubt it, say
Yeah, I heard about it, so let's talk about it, babe

Complete (Complete)
Centered, balanced
Grounded
Free, sheltered
Safe space, it's crazy
We deeper than twin flames
We the whole fire
Spent my whole life feeling like I don't need love
Then you opened me up, now you got me so stuck
And I see God in her son, I know you're not the nigga he was

And you want me to love you
Want me all over you, baby
You don't gotta hide it
You want me to have your babies
Yeah, you all about it and I'm all about it, babe
I know you valid, I will would doubt it, babe
Yeah, I heard about it, so let's talk about it, babe

You know, you know you are my lover, baby
My lover, baby
You got me twisted over you
And I
I know I got what you need
I got just what you need, oh
So what you wanna do?
