

Love Can Save It All

Andra

Part of me
Is part of you
So take my hand
I want you to feel
Words you can't hear
I love you so
And you love me
So tell me why
Why does it feel
Like we're thousand miles apart

For better or for worse you stood next to me
Always found a way not to give up on me
Remember when you used to say

You know our love can save it all
We've been together for so long
So don't give up on who we are
We'll work it out somehow
You know a word can change it all
I had my doubts but now I know
I wanna be with you for life
Each day and every night
Because our love can save it all

I wish there was
Another me
Another you
So we could go back
To the point where we met
Another place
Another chance
We'll make it right
So meet me halfway
I know you feel the same

For better or for worse you stood next to me
Always found a way not to give up on me
Remember when you used to say

You know our love can save it all
We've been together for so long
So don't give up on who we are
We'll work it out somehow
You know a word can change it all
I had my doubts but now I know
I wanna be with you for life
Each day and every night
Because our love can save it all

You know our love can save it all
We've been together for so long
So don't give up on who we are
We'll work it out somehow
You know a word can change it all
I had my doubts but now I know
I wanna be with you for life

Each day and every night
Because our love can save it all
