

## At My Side

Andragonia

Another chance we have to try  
Things have changed I don't know why  
Love is flame and we must to keep it alive  
So many words I have to say  
Our love is lost along the way  
This pain hurts so much I can't deny

Time goes by, shows me all the happiness we shared  
This could last forever  
Days and nights I have spent them thinking about a way  
To make you come back

I've turned on the lights and you're not there  
I'm searching for you and in the mirror I stare  
I can't go on with your voice within my mind  
We've got to learn from our mistakes  
Forget the times I've left you down  
Hear What I say cause it comes from my heart

Time goes by, shows me all the happiness we shared  
This could last forever  
Days and nights I have spent them thinking about a way  
To make you stay

Solo 1: Leitao  
Solo 2: Larenttes

Time goes by, shows me all the happiness we shared  
This could last forever  
Days and nights I have spent them thinking about a way  
To have you at my side!
