

Together

Andrew Allen

If you wanna see what my smile looks like
Come and be by my side
We'll just laugh all day
If you wanna know what the stars are like
Let's hang with the moon tonight
It's not that far away

When we're together, oh
We can do whatever, oh
Play the sand, dance in the sea
Give me your hand, just you and me
Together, always forever, oh
We can find out what together's is all about
(We can find out what together's all about)

Maybe we could for a walk today
Smile at the things we say
And laugh until we cry
Maybe we could lie in the grass
While rockin' these shades in style
We'll have the perfect time

When we're together, oh
We can do whatever, oh
Playin' the sand, dance in the sea
Give me your hand, just you and me
Together, always forever, oh
We can find out what together's all about

We can find out what together is all about

When we're together
We can do whatever
Play the sand, dance in the sea
Give me your hand, just you and me
Together, always forever, oh
We can find out what together's all about
We can find out what together's all about
We can find out what together's all about
