

What I Like About Us

Andrew Allen

There's so much crazy in the things that we do
Like running naked through the hall to our hotel room
Can't seem to catch my breath whenever you're by my side

And if it's morning but the night isn't done well
It'd be fine with us, we'll move the party into the sun
It doesn't matter, that everybody else is around

Because in every way it's you that I trust
And I promise I'll stay when we both start to rust
And I know when you say 'I love you', you must
And baby, that's what I like about us

You're like a picture with a million more words
I'm loving listening to you talk while we're feeding the birds
If every day could be as perfect as the one right now

We're not just laughing when the sun is to blame, no
'Cause we both figured out that dancing's way more fun in the r
ain
It doesn't matter that everybody else is around

Because in every way it's you that I trust
And I promise I'll stay when we both start to rust
And I know when you say 'I love you', you must
And baby, that's what I like about us

Any day, any time that we go anywhere
We decide that a postcard will prove we were there
In a way, it's all how I know it should be

Because in every way it's you that I trust
And I promise I'll stay when we both start to rust
And I know when you say 'I love you', you must
And baby, that's what I like about
Every way it's you that I trust
And I promise I'll stay when we both start to rust
And I know when you say 'I love you', you must
And baby, that's what I like about us
That's what I like about us
