

# Black Clouds

Andrew Belle

How many of you out there?  
Somebody ran you down  
Got you running around and round  
Somebody hurt you  
Now you're living underground  
Just a cover in a dust bowl town  
Anyway

I was thinking I could love you  
I was thinking I would try  
The black clouds are gonna part for you  
Will follow me tonight

Who would have ever thought of it  
Autumn, it falls apart  
Primary colors that we know by heart  
So what's the rush for?  
If it's good, it never goes away  
Or was that just something that we used to say  
Used to say

I was thinking I could love you  
I was thinking I would try  
The black clouds are gonna part for you  
Will follow me tonight

We were wrong about you  
Every step without you  
Every hole that I fall into says  
I belong, that I belong  
We were wrong about you  
Every step without you  
Every wall that I run into says  
I belong, that I belong  
We were wrong about you  
Every step without you  
Every wall that I run into says  
I belong, that I belong

I was thinking I could love you  
I was thinking I would try  
The black clouds are gonna part for you  
Will follow me tonight
