

# Dive Deep

Andrew Belle

This is my heart  
Dive deep  
You have something that I wanna keep  
We get carried away  
Don't stop  
I've got nothin but time  
So come down when you wanna start

Oh I don't wanna stay up  
Out here on your fire escape  
But you won't let me go  
Ice Age is on the stereo  
We started a fuse  
We started a tidal wave with a spark  
And I don't know you  
So are you stickin around  
Or you just passin through

This is my heart  
Dive deep  
You have something that I wanna keep  
We get carried away  
Don't stop  
I've got nothin but time  
So come down when you wanna start

And when I disappeared  
New York felt wrong without you dear  
My futures in your laugh  
Your colors in my photograph  
We started a fuse  
We started a tidal wave with a spark  
And I don't know you  
But you're what I want and that's all  
You're what I want and that's all

This is my heart  
Dive deep  
You have something that I wanna keep  
We get carried away  
Don't stop  
I've got nothin but time  
So come down when you wanna start  
Come down when you wanna start

And I wanna be honest  
When it hurts to be honest  
And I'm hoping you start  
To let me into your heart  
Then we'll write on the wall  
You're what I want and that's all

This is my heart  
Dive deep  
You have something that I wanna keep  
We get carried away  
Don't stop

I've got nothin but time  
So come down when you wanna start  
Come down when you wanna start

This is my heart  
Dive deep  
This is my heart  
Dive deep
