

Down

Andrew Belle

Somebody said that you know when you know
That's all I got so I got with the flow
Nobody died playing safe from the ground
We'll only fly if we don't look down
If we don't look

Down, down, down
No we won't look down
No we won't look down
No we won't look down

Somebody said that you are who you are
But who's to blame when you've gone too far
Its hard to sing without making a sound
We only fly when we don't look down
If up's all we got then we don't hit the ground

Down, down, down
No we won't look down
No we won't look down
No we won't look down

Oh I don't know the way behind it
We're always searching around to find it
But I promise to catch you
Whenever you're looking

Down, down, down
No we won't look down
No we won't look down
No we won't look
Down, down, down
No we won't look down
No we won't look down
No we won't look down
