## **Open Your Eyes**

## **Andrew Belle**

Open your eyes now Open your eyes now It's time to see If you can reach me

Open your eyes now
Open your eyes now
It's time to leave
It's time to leave me

Open your eyes now
Open your eyes now
It's time to see
If you still believe me

Open your life now Open your life now I'll try to be All that you need me To be

She'll be a star now
I will follow her lead
She'll be a scar now
I will still let her bleed

Open your eyes now Open your eyes now Try to speak Like you can see me

Open your eyes now Open your eyes now I'll try to be

Almost everything You need me to be

She'll be a star now
I will follow her lead
She'll be a scar now
I will still let her bleed
All over me

She'll be a star now She'll be a scar now

She'll be a star now She'll be a scar now

She'll be a star now She'll be a scar now

She'll be a star now She'll be a scar now

She'll be a star now

She'll be a scar now

She'll be a star now She'll be a scar now I will let her bleed All over me

All over me
