

Signs Of Life

Andrew Belle

Show me where your car is parked
and I'll drive it for you
I am made of light
and dark
but i shine before you
all this water you've charted on this blue
ocean
I can't stop what you've started

and when i say oh, don't you want
me?
don't you need me?
cause I, I feel let down
the same red ruby, blood
flows through me
but I, don't feel it now

show me where you lost your heart
and i'll find it for you
but all these strings on my guitar
won't solve this
for you
all this ice that you've broken
won't hold you up from
all these
lies that you've spoken

cause all these doctors say that
this is an
emergency
i'd give my eyesight for
a little bit of urgency
or just some
signs of life
consider this a courtesy
from me to you
cause i don't know how
much longer i can drive you home

it's just a little closer to your
grave
but i still remember all the things you gave me

cause all these
doctors say
that this is an emergency
i'd give my eyesight for
a little bit
of urgency
or just some signs of life from you
