

Safe and Sound

Andrew Gold

The night has come so gently sleep
And drift into your dreams
Of worlds beyond, of joy and peace
Not like the one you live

This place is dark and full of lies
And hurts that never heal
Sleep dissolve and when you rise
May all your dreams be real

The future lies with you my child
My precious golden one
This earth was green and full of hope
But look what we have done

All the battles we have lost
The bridges we have burnt
Sleep dissolve, you'll get across
And still the world will turn

So far away from the shadows we make
Stars that surround you shine bright
Know that I love and when you awake
Bring back a message of light

If I could change the world I knew
The answer will be found
So make your way tonight dissolve
And come back safe and sound
Come back safe and sound
