

# Before You Know It

Andrew Ripp

I know it's been a long cold winter but the summers gonna melt the snow  
Listen to the robins singing as the frozen rivers start to flow

I promised you a steady love  
Strong enough, it won't cave in  
I'll be with you wherever you dare to go  
Until the end, yeah

Before you know it things are gonna get better  
Before you know it you'll be standing on the other side  
You've got no reason to be worried 'bout forever  
This very moment  
Before you know it

Sooner than later you'll be living in the answer  
Of every prayer that you prayed when you thought your hope was gone  
For all you know maybe your miracle has happened  
This very moment  
Before you know it

It's like you got your arms stretched out and you're waiting for the wind to  
blow  
Standing on the mountaintop but your eyes are on the valley below

I promised you a steady love  
Strong enough, it won't cave in  
I'll be with you wherever you dare to go  
Until the end, yeah

Before you know it things are gonna get better  
Before you know it you'll be standing on the other side  
You've got no reason to be worried 'bout forever  
This very moment  
Before you know it

Sooner than later you'll be living in the answer  
Of every prayer that you prayed when you thought your hope was gone  
For all you know maybe your miracle has happened  
This very moment  
Before you know it

I know you can't see it right now  
From deep in the shadow of doubt  
My love will carry you out

And though you can't say it right now  
Beyond a shadow of doubt  
My love will carry you out

Before you know it things are gonna get better  
Before you know it you'll be standing on the other side  
You've got no reason to be worried 'bout forever  
This very moment  
Before you know it

Sooner than later you'll be living in the answer  
Of every prayer that you prayed when you thought your hope was gone

For all you know maybe your miracle has happened  
This very moment  
Before you know it

This very moment  
Before you know it
