

Borrow Faith

Andrew Ripp

Let me take you over the rainbow
Out of the hollow place you feel inside
Let me lead you out of the shadow
Out of the darkness, let me shine the light

I want to be the one who believes in you
Bullet to the heart I can see right through
Nothing left to hope, nothing left to do

I don't know why
Beautiful things gotta die
Our love will survive
We've got to borrow faith

I know you're tired and you've lost your fire
You lost your way out of all the pain
I know you doubt it, it's easy to doubt it
It's easy believing that things will never change

I want to be the one who believes in you
Bullet to the heart I can see right through
Nothing left to hope, nothing left to do

I don't know why
Beautiful things gotta die
Our love will survive
We've got to borrow faith
I don't know why
Beautiful things gotta die
Our love will survive
We've got to borrow faith

I believe in you
I believe in you

I don't know why
Beautiful things gotta die
Our love will survive
We've got to borrow faith
(We've got to borrow faith)
Beautiful things gotta die
Our love will survive
Sometimes you [?] faith
