

# Evergreen

Andrew Ripp

We get lost in the middle of it all  
Caught up in another free fall  
Desperate for a short term dream  
Missing the forest for the trees

We get stuck thinking heaven's holding out  
While a piece of it's happening now  
I know when I'm looking at you  
Start thinking that it might be true

Seasons may push and pull apart  
But I won't let you forget we are

Under the same stars ancient hearts started to beat  
Made by the same stuff that covers every mountain with trees  
And when our time has faded out I promise you we will see that  
Love is forever, love is forever  
Evergreen, oh...  
Evergreen

Let's get lost in the rhythm of the sky  
Lifetime's living in the blink of an eye  
Stop thinking this is all we got  
Cuz if we got love then we've got it all

Seasons may push and pull apart  
But I won't let you forget we are

Under the same stars ancient hearts started to beat  
Made by the same stuff that covers every mountain with trees  
And when our time has faded out I promise you we will see that  
Love is forever, love is forever  
Evergreen, oh...

Always returning like the sun sets into the sea  
The love we give is gonna go on infinitely  
It's rising up from hiding roots buried in the deep  
Our love is forever, love is forever

Under the same stars ancient hearts started to beat  
Made by the same stuff that covers every mountain with trees  
And when our time has faded out I promise you we will see that  
Love is forever, love is forever  
Evergreen  
Oh, love is forever  
Evergreen, oh...  
Evergreen
