

Know Your Heart

Andrew Ripp

When you call my name
I wanna know it's you
I wanna know it's you
Have me recognize it
I wanna know it's you
I wanna know it's you

Silence the noise with your voice
Your word, your truth
Speak directly to me
I'm listening

I just wanna know your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything
Your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything

Don't hesitate
Make it loud and clear
Make it loud and clear
Do whatever it takes
To let me know you're here
Let me know you're here

I just wanna know your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything
Your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything

Silence the noise with your voice
Your word, your truth
Speak directly to me
I'm listening
Silence the noise with your voice
Your word, your truth
Speak directly to me
I'm listening

I just wanna know your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything
Your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything

Your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything
Your heart
I just wanna know your heart
I just wanna know your heart better than I've ever known anything
