

Besides You

Andy Williams

I know that you
Know that I'm in love with you
You love me too
And for me
It's just the first time
Out of my mind
Over matters such as these
Please, won't you please
Stay forever or until
It makes me stop and think

That I don't want anybody beside me
I don't need anybody standing
Beside me
Beside you
No, I don't want anybody beside me
I don't need anybody standing
Beside me
Beside you

Now you came to me
You and me came to be
Happy company
And all that took
Was just a little
Love is a word
Justifiably inform
Some of the words
And the comments that you make
It makes me stop and think

That I don't want anybody beside me
I don't need anybody standing
Beside me
Beside you
No, I don't want anybody beside me
I don't need anybody standing
Beside me
Beside you
