

Here and Now

Andy Williams

Mama's afraid for your heart
She's certain I'm gonna break it
Daddy said from the start
I don't have what it takes to make it

You got friends who say
One day I'll do you wrong
And I got friends who say
I'll wait to find you gone
It ain't so

All I know, is here and now
I wanna give my life to you
Here and now
All we ever have to hold onto

A moment at a time
Is the only way we'll find forever love
So let's take care of
Here and now

Finding what the future held
This old world fall at my feet
Life gives no one guaranty
Just ask the folks who work on Wall Street

And I don't need a crystal ball
To know my heart
If tomorrow this old world falls apart, sky and all
We'll let it fall

It's here and now
Wanna give my love to you
Here and now
Is all we ever have to hold onto

A moment at a time
Is the only way we'll find forever love
So let's take care of
Here and now

Moment at a time
Is the only way we'll find forever love
So let's take care of
Here and now
