

Better Than This

Ane Brun

We are better than this
This is takin' over
This is breaking us down

Oh we are better than this
Better than this
Moovin' in fast paths
Towards a tipping point

You must be better than this
Better than this

The signs are around us
Solutions already there
We're all part of this same line up
There's no one else here

We must be better than this
Better than this
Better than this
Better than this

I can't believe that we will learn from history
I can't believe that we will learn from history
I can't believe that we will learn from history
Will learn from history
Better than this

Fate is always pending
Let's take the wheel and turn away
From that place there's no returning
We're overdue let's leave today

We're hoping for a windfall
To live in eternal spring
Is this something we will die for
When we find out we can't win

We'd be better than this
Better than this
It must be better than this
Better than this
We gotta be better than this
We must be better than this
Better than this
We gotta be better than this
