

Baby, there's nobody like you, girl
No love like this, you taste like bliss
And when we kiss
You take me straight to outer space
I float through your neon clouds
You're an alien and baby when we touch
I leave the ground, yeah
I leave the ground, yeah

Come on, girl
So, beam me up and take me anywhere you wanna go
I've met a million women, you're the one I wanna know
You must be from another planet, girl
The way that you feel, so mythic and real, baby
And it's a dream for me to be the one you choose to love
Maybe it's make-believe, but I believe in us
So, I'll do anything just to prove to you
That I'm the right dude, baby girl, there's nobody like you

There's nobody like you, girl
No love like this, you taste like bliss
And when we kiss
You take me straight to outer space
I float through your neon clouds
You're an alien and baby, when we touch
I leave the ground, yeah
I leave the ground, yeah

And there's no gravity when you're next to me
I am lifted off my feet
While I'm balancing fear and ecstasy
You're the only air I breathe
When I'm next to you, minutes turn to days
You can slow the hands of time
Every moment fades in your Milky Way
I get lost in your divine every time

There's nobody like you, girl
No love like this, you taste like bliss
And when we kiss
You take me straight to outer space
I float through your neon clouds
You're an alien and baby, when we touch
I leave the ground, yeah
I leave the ground (Go ahead)

Said I leave, I leave the ground, yeah
I leave, I leave the ground
I leave, I leave the ground, yeah
Said I leave the ground, yeah
And baby, when we touch, I leave the ground
