

Lock N Key

Anella Herim

I'm cool with the late nights
Few cars in the driveway
Been straight on the nightlife
How'd you get me sideways?
You had me at drinking
Slow dancin' and singing
Usually don't go out, but something's different this evenin'

It could've been the drinks
It could've been the bar
It could've been just me thinking 'bout you in my arms

You got me downtown city spinning 'round me pretty
Sipping something sweet, but baby, you know me
I like the low-key play
The music slowly, simple
Like a lock and key
Makes sense like you and me

You got a something and you're bringing out and something it be
I've never had nobody make me feel so meant to be
You got me downtown city spinning 'round me pretty
Sipping something sweet
Makes sense like you and me

Guess you could say you got me wrapped around your finger
Like my hand around this Miller, or my arms around your waist
'Cause if you want it, I'll be back here tomorrow
The same time and the same place

It could've been the drinks
It could've been the bar
It could've been just me thinking 'bout you in my arms, girl

You got me downtown city spinning 'round me pretty
Sipping something sweet, but baby, you know me
I like the low-key play
The music slowly, simple
Like a lock and key
Makes sense like you and me

You got a something and you're bringing out and something it be
I've never had nobody make me feel so meant to be
You got me downtown city spinning 'round me pretty
Sipping something sweet
Makes sense like you and me
