

Petals

Anfa Rose

He ain't gon ride for ya, yeah
I don't tell lies to ya yet
I'm a good guy to ya, yeah
Don't make me switch side on ya yet
Need a cosign for ya, yeah
Needed more time to reflect
One more lie ain't alright
Oh, its just another night for you, yeah

Oh, you tell me you gon keep my secrets
Oh, you tell me you gon keep my needs fed
Good role model for my nieces
Keep the grass cut short for the leaches
These days is like jeepers creepers
Act sweet but shit ain't shit sweet here
I been chilling with a bitch at her mans cribs
I'll be living how I can cos I can live

Ain't no news you got too many problems
You stay loose off the goose and the powder
Say I do then I don't in an hour
Watch that petal fall
Then we set it off

He ain't gon ride for ya, yeah
I don't tell lies to ya yet
I'm a good guy to ya, yeah
Don't make me switch side on ya yet
Need a cosign for ya, yeah
Needed more time to reflect
One more lie ain't alright
Oh, its just another night for you, yeah...

Flying out to see me where I stay
Ain't no right time or the right place
Both down to learn it the hard way
No other way no way hosè
Say you from a city where they don't pray
Unless its for the dollar or the dulce
Type you wanna hola gotta man up
Around me all players and we don't play

And you know the sunshine don't shine forever
But the moonlight shine might shine it better
And the tides and got no time but petals
So as long as were here there we might as-well shine together
Doing me head down you know how it goes
Looked up things switched so much it shows
Yeah, its telling when you ain't tryna tell me nothing
Got love for ya but I can't smell your rose

Ain't no news you got too many problems
You stay loose off the goose and the powder
Say I do then I don't in an hour
Watch that petal fall
Then we set it off

He ain't gon ride for ya, yeah
I don't tell lies to ya yet
I'm a good guy to ya, yeah
Don't make me switch side on ya yet
Need a cosign for ya, yeah
Needed more time to reflect
One more lie ain't alright
Oh, its just another night for you, yeah...
