

Stars

Angel City

Wake up, to the sunlight
This place, seems so bright
Echoes from the night before
just leave me wanting more

Oh life moves too fast but
I'm caught in the past, I can't move on
And when day turns to night that's when
I get the sight of what should be
With you

(Look at the stars) They watch you forever
(Do they know where you are) Could they bring us together
(Open your eyes) Do you see what I see
(Night's on our side) Cos stars they watch you watching me

What's up, what's going on
In a crowded room I feel all alone
I just want some peace of mind that I can't seem to find

I'm just stuck in a space where I can't find a place
To belong
And when day turns to night that's when I get the sight
Of what should be
With you

(Look at the stars) They watch you forever
(Do they know where you are) Could they bring us together
(Open your eyes) Do you see what I see
(Night's on our side) Coz stars they watch you watching me

If you look at the stars, do you see what I see

Could they bring us together
Could they bring us together

(Look at the stars) They watch you forever
(Do they know where you are) Could they bring us together
(Open your eyes) Do you see what I see
(Night's on our side) Coz stars they watch you watching me
