Disbeliever

Angel Dust

I'm walking and watching
All the things I've seen before a million times
It's cold neon light
A stranger on his way
A world, that's always been cold and gray
Just wait another day

Tell me now - Is this the world that you have made for me?
Is this all you'll let me be?

Hold the children for me
That scream in the night because of you
It's empty - no light
You've told me that I am impersonation of humanity
I only want to cease to be

Tell me now - Is this the only world that you have made for me?
Is this all you'll let me be?

Hold me now
Save me from the ghosts that haunt my nights
Don't say goodbye
When the shadows fall down on me in the night
Alone - again

Just for your love I will be undead for all eternity
You're watching over me
Lovely creature - darkest night
Come back again to me
It's just like you...were once before

Don't tell me now that this is the only world - oh no
Don't tell me about your point of view
Save it for someone else - what to do
Alone again
