

# Inhuman

Angel Dust

With might the forceful makers build  
Machines that will take control  
Inhuman - They use us to  
build and to guide them  
We turn our backs and we'll lose it all

[Chorus]  
Don't say goodbye  
You tried and you tried  
You lied and you left me here for so long  
Don't say farewell  
When you go to hell  
You're a machine and you will never die

Inhuman - They are taking over

And they will always be  
Wind up men controlling us  
Manifesto humanity
