

# Planes Fly

Angel Haze

Don't think your love is the antidote  
Don't try to fix me when you know you're as just as broken  
Don't tell me that I'll be ok  
When every time you kiss me you can taste a little pain  
We can dance with the stars while I fish from the moon  
You sent messages bottled to the pits of my womb  
And I thought that in the midst of me dying you'd find a cure for me  
And magnetize your vibrance and finally have a pull on me  
I pictured you running to everywhere you need to go  
I'm up in the air still running from everything below  
Yeah  
I'm not sure what this is  
But I got jet fuel in my soul, propellers tied to ribs, we'll fly  
When the tunnels got no light  
And the light exposes messed up life  
It's alright when the good feels bad but the bad feels better  
Planes fly  
High enough to take us anywhere  
And We'll go  
But hear no, breathe no, see no fear  
And I know  
Trouble will find wherever we are  
Keep wishing easy baby we'll be closer to the stars  
Swallow my secrets like a bitter pill  
Repeat the same mistakes, the wounds will never heal  
You know the reason I can't look you in your eyes  
But I want your guilty body like you love my dirty mind  
We'll fly  
And I will never steer you wrong  
So try  
And when everything is gone  
Then i  
Will be wherever you reside  
With my eyes full of passion desire running behind it  
I don't know what that means but I'm sure we'll find out together  
When the good feels bad and eternal feels like forever  
And hearts slow sink like a bird's lost feather  
To end all, to be all to a pulley to a lever  
Planes fly high enough to take us anywhere  
And we'll go  
But hear no, breathe no, see no fear  
And I know  
Trouble will find wherever we are  
Keep wishing easy baby we'll be closer to the stars  
Keep running baby 'til you find yourself tonight  
Keep running baby here you can be what you like  
Keep running baby 'til you find yourself tonight  
Keep running baby  
Spread your wings and fly  
Planes fly  
The way the skies like faded faith  
And I've tried  
To live my life at my now pace  
But we lose  
So much time here on the ground  
So it's now  
Take your fly and burn it down

Planes fly  
High enough to take us anywhere  
And we'll go  
But hear no, breathe no, see no fear  
And I know  
Trouble will find wherever we are  
Keep wishing easy baby we'll be closer to the stars  
Keep running baby 'til you find yourself tonight  
Keep running baby here you can be what you like  
Keep running baby 'til you find yourself tonight  
Keep running baby spread your wings and fly
